Meeting May 8, 2026 at 13:30 CDT

Meeting records  Transcript

Summary

Project status review and PDF import strategy discussion with finalized subscription tier and pricing model decisions.

Project Status and Timeline

Development timeline targets a June launch to allow for PDF import refinement. The automated system will extract content directly from issue files.

Subscription and Access Strategy

The website will serve as a central hub using Pelcro for entitlement management. Digital access includes paywall-controlled previews for non-subscribers.

Pricing Model Decision

Subscribers will transition to a single combined print and digital tier priced at 159 dollars. Existing users retain legacy rates until renewal.

Decisions

We've **updated the Decisions section** using your feedback.

Let us know what you think: [Helpful](#) or [Not Helpful](#)

ALIGNED

- **June 1 project launch** The project launch date is set for June 1.
- **PDF file submission standard** The file submission requirement is set to PDF files only, eliminating the need for JPEG images.
- **Random free article preview** The logic for selecting free preview articles is set to randomized selection rather than defaulting to the cover story.
- **PDF-only download fallback** The backup strategy is set to allow direct PDF downloads if the AI importer fails to consistently parse articles by the following week.
- **Subscription access tier structure** Subscription tiers are defined as print-only for physical copies, digital-only for current and future digital issues, and print-plus-digital for full access to the digital archive.

Next steps

- ☐ [Liz Wilson] Prepare PDF Catalog: Clean up and organize all back issue PDFs and covers. Place files side by side in correct folder structure for delivery.
- ☐ [Justin Lobaito] Enhance Importer: Keep working to fix the PDF importer to accurately parse full article content. Implement random free article selection, excluding the cover story, and incorporate article images.
- ☐ [Justin Lobaito] Map Entitlements: Map the individual back issue SKU entitlements previously sent to Gal back to the website system. Ensure proper access verification is functional.
- ☐ [Liz Wilson] Schedule Pelcro Meeting: Schedule required meeting with Gal and Justin Lobaito. Discuss the subscription transition strategy for 119 and 159 pricing tiers.

Details

- **Initial Audio Check and Connection Issues:** The beginning of the meeting involved an extended attempt to resolve audio issues, where Justin Lobaito could hear Liz Wilson, but Liz Wilson reported being unable to hear Justin Lobaito. Liz Wilson noted that a recent trip and changes to their computer might be related to the issue, though they

confirmed the microphone array was checked ([00:00:00](#)). Despite the technical difficulty, they decided to proceed with the meeting using the existing connection ([00:04:49](#)).

- **Project Tempo and Personal Updates:** Justin Lobaito apologized for a slowdown in the project tempo, explaining that they had been moving and needed time to get situated in their new house, but affirmed that they should be able to get the project back on track. Liz Wilson expressed understanding, noting that the delay was beneficial for them because they had been ill for three weeks with what turned out to be COVID, initially thinking it was severe pollen allergies ([00:06:57](#)).
- **Target Launch Date and Import Process Refinement:** Justin Lobaito proposed targeting June 1st or the first week of June for the website launch to ensure a tangible goal. This date would allow them to refine the import process for Liz Wilson's PDFs, which involves chronologically running the catalog through a custom-built importer designed to scrape the PDFs for individual articles ([00:07:54](#)).
- **PDF Requirements and Automatic Extraction:** Justin Lobaito confirmed that they only require the PDF of the entire issue, as the importer has been trained to automatically extract the cover image and relevant information, eliminating the need for Liz Wilson to provide separate JPEG covers. In a recent test, the importer successfully extracted eight different articles and a pull quote from an issue titled "The Milkman Delivers Again" ([00:09:00](#)).
- **SKU Management for Entitlements:** Liz Wilson's consistent titling of the PDF files, such as "TQ 20 whatever," was noted as helpful because Justin Lobaito used this information to give entitlements back to Gal. Justin Lobaito explained that they sent a CSV file to Gal detailing all the back issue SKUs and instructions to add entitlements so that individual issues could be purchased and viewed on the new website ([00:10:01](#)).
- **Website Content Access and Paywall Strategy:** The purpose of the import process is to enable people to read the content in a digital format directly on the website. Subscribers with matching entitlements will not see a "subscribe to read" button but will instead have the option to download the PDF and read all individual articles; non-subscribers can preview one free article from the issue as a marketing teaser ([00:10:59](#)).
- **Selection of the Free Article:** Currently, the system defaults the cover article as the free article, but Justin Lobaito is able to change the logic to select a different article, such as the fifth one, or even a random one that is not the cover article ([00:12:03](#)) ([00:13:51](#)). Liz Wilson suggested trying a random article that is not the cover story, as some cover articles comprise the majority of the issue's content ([00:13:00](#)).
- **Article Display on the Website:** All articles get pushed into a topic section on the website, where paywalled articles show only a preview with a "subscribe to read" prompt. Free articles, which are selected as a teaser, are entirely readable on the

website, allowing people to see a full article and other content previews before subscribing ([00:14:43](#)).

- **Importer Improvements and Missing Images:** Justin Lobaito is currently working on improving the importer to correctly extract the entire content of articles, as they noticed an issue where one article stopped prematurely, losing some of the copy ([00:19:04](#)). The next iteration of the importer will also focus on incorporating images from the articles and placing them as accurately as possible within the web content ([00:16:37](#)).
- **Fallback Plan and Website as a Central Hub:** If the article importer cannot be made consistent and reliable, the phase one launch fallback plan is to revert to offering only PDF downloads ([00:21:38](#)). In this scenario, the website would still be the single source for people to be driven to, handling the login, entitlement verification (via Pelcro), and either allowing a direct download or prompting a purchase ([00:22:47](#)).
- **Handling Entitlements via Pelcro for Downloads:** Justin Lobaito outlined that if the importer fails, the website would manage verification through Pelcro using the entitlement strategy that was sent, ensuring people must log in to determine if they can download an issue ([00:24:22](#)). This process is intended to replace the current method where anyone with the email link can download the issue ([00:23:48](#)).
- **Monthly Issue Upload Process:** Liz Wilson asked about the monthly process for loading a new issue, and Justin Lobaito confirmed that they would handle the back-end process of creating the new issue, entering details like the title and volume number, and uploading the PDF ([00:25:39](#)). Once the issue is uploaded, the ideal state is for the system to automatically trigger an email through Mailchimp to subscribers notifying them of the latest issue ([00:27:56](#)).
- **Subscription Tiers and Access Levels:** Liz Wilson and Justin Lobaito discussed the proposed subscription tiers, affirming that digital-only subscribers get access to current and future digital issues within their active subscription period ([00:31:47](#)). Print and digital subscribers would receive the 10 printed issues, one free bonus issue, and access to the complete 270+ issue archive going back to 1999 ([00:36:19](#)).
- **Pricing Strategy for Print and Digital Tier:** They discussed simplifying the pricing structure by offering one "Print and Digital" tier that includes the entire back issue catalog, suggesting a price bump from the current \$119 to \$159 ([00:33:57](#)) ([00:37:24](#)). The approach for transitioning existing \$119 subscribers would be to maintain their legacy pricing until their renewal, at which point they would renew at the new \$159 price point ([00:38:24](#)).
- **Need for a Meeting with Gal Regarding Pricing Transition:** Liz Wilson expressed difficulty thinking through the transition logistics due to the complexities of how Pelcro handles subscription renewals and issue counts ([00:39:30](#)). They agreed that the next step regarding the pricing and entitlement transition is to schedule a meeting with Gal

from Pelcro, with Justin Lobaito included to help communicate the necessary changes ([00:37:24](#)) ([00:40:23](#)).

- **Scheduling the Pelcro Meeting:** Justin Lobaito suggested scheduling the meeting with Gal for Friday the 15th, preferably at 2:00 PM, or the following Monday, where they are wide open after 1:00 PM ([00:41:16](#)). Liz Wilson agreed to push for Friday and provide Gal with the potential timing options ([00:42:34](#)).
- **Final Tasks and Marching Orders:** Justin Lobaito's final marching orders for Liz Wilson were to continue collecting and cleaning up all of the PDFs for the catalog, including the covers, and to schedule the meeting with Gal ([00:43:39](#)) ([00:46:18](#)). Liz Wilson committed to working on preparing the PDF files over the weekend to have them ready for Justin Lobaito ([00:45:33](#)).

Meeting May 8, 2026 at 13:30 CDT - Transcript

00:00:00

Liz Wilson: Welcome to Welcome to my world and iPhone.

Justin Lobaito: Do you hear

Liz Wilson: Well,

Justin Lobaito: me?

Liz Wilson: speakers, how about

Justin Lobaito: You hear me

Liz Wilson: that

Justin Lobaito: now?

Liz Wilson: speaker?

Justin Lobaito: any luck.

Liz Wilson: I'm looking at my settings. Not quite sure works.

Justin Lobaito: How about now?

Liz Wilson: tools. I'm not sure what's happening, Justin. I'm not. You know, again, you know that I just clueless here. Full screen. Adjust reporter problem settings. Okay. audio hold unmute your mic. Can you hear me

Justin Lobaito: Yeah, I hear you hear me.

Liz Wilson: now? USB device. I don't have a USB. Okay. On here it says microphone array

Justin Lobaito: Hey, do you hear me?

Liz Wilson: intel studio sound build. Is that your sound? That's checked. Press and hold spacebar to unmute your mic.

Justin Lobaito: You're You're not muted. You're Do you hear me?

Liz Wilson: You still can't hear me?

00:04:49

Justin Lobaito: No, I hear you. You're You're good. I can hear

Liz Wilson: It's just I can't hear you.

Justin Lobaito: you.

Liz Wilson: All right. Um, thanks. Okay. So when you say calling in, so just call you or call it.

Come on. Okay.

+1 404-*40: 3 1 0 4 0 is not available. At the tone, please record your message. When you have finished recording, you may hang up or press one for more options.

Liz Wilson: Sorry, Justin. What do I need to do?

Justin Lobaito: Hey, you hear me?

Liz Wilson: Yes.

Justin Lobaito: I'm not sure what's going on. We'll just do

Liz Wilson: Yeah, because I I don't know.

Justin Lobaito: this.

Liz Wilson: That's it's never happened before, but I I took my computer on a little trip, so I don't know and sharing it if something has changed or whatever. But let's go ahead. Go

Justin Lobaito: Yep. Uh,

Liz Wilson: ahead.

Justin Lobaito: okay. So, yeah, I apologize for kind of the slowdown in tempo.

00:06:57

Justin Lobaito: My uh my girlfriend and I, we were moving and so we've been trying to deal with getting the getting everything situated over, but we're finally in the house here and everything and we should be able to get this back on track for you. So, I'm gonna

Liz Wilson: No, I understand it's all been good because with, you know, I just kind of always, like I say, trust in in God's providence because I was have been sick. I didn't know that I had um COVID that some virus. I thought it was just a pollen, but for like three weeks, I was just feeling terrible.

Justin Lobaito: Yeah.

Liz Wilson: We had such bad pollen going on here that I mean every day was just a challenge and I

Justin Lobaito: very

Liz Wilson: went to the doctor and got questions and said you know you know you've you've had co and I was like no I didn't realize that. So anyway, that's where I am in this hour. So I'm think today with changing the time um we're

Justin Lobaito: time issue and I just got all

00:07:54

Liz Wilson: late on the issue and I just got all the stuff I needed like right before you

Justin Lobaito: the stuff I need like so I I

Liz Wilson: sent this link to get on. So all is good.

Justin Lobaito: think what I want to shoot for and really lock it in, get a good healthy catalog of your PDFs upload to uploaded to the this new dashboard. uh is let's try and let's try and target this whatever state we're in and we'll we'll get in a state that we feel comfortable with for June 1 and we'll target June one as a launch date um

Liz Wilson: Okay.

Justin Lobaito: or first week of June if that feels okay with you. Okay,

Liz Wilson: Yes.

Justin Lobaito: that way can we at least have something to target and I can refine this kind of import process for you. So, as you collect all of your, you know, 27 years or 26 years of a catalog, um, I'll be running in just chronologically running them through this, uh, this importer that that I built and it should be scraping the PDFs and getting everything that we need out of that as individual articles.

00:09:00

Justin Lobaito: The most recent one that I did here, just as another test, was the milkman delivers again.

Liz Wilson: Mhm.

Justin Lobaito: So it it pulled in everything that I could for I could see as being relevant information. It took a poll quote out of it. Um and then it started to create the individual articles. So the cover story gets to be the and I've been training it kind of like as we've been uploading things and getting it better at reading your PDF specifically. So, it extracted eight different articles. If I view what it looks like, it automatically extracts the So, you don't need to give me the JPEGs anymore. You just need to give me the PDF because it automatically extracts the first page as the

Liz Wilson: Okay. Okay.

Justin Lobaito: cover.

Liz Wilson: So, so you just Okay. So, um you just need the PDF of the entire issue or the cover

Justin Lobaito: Yes.

Liz Wilson: and Okay,

Justin Lobaito: the the entire issue.

Liz Wilson: that's it. All right,

Justin Lobaito: Yep.

00:10:01

Liz Wilson: because I was I kept it all together. What I did was I have them all together in one file now, but I need to clean it up for you. And the way that I sent you was just real simple

changing all the the titles to be the same

Justin Lobaito: Yeah,

Liz Wilson: TQ 20

Justin Lobaito: that's been perfect because I was using that then to give the information back to Gal

Liz Wilson: whatever.

Justin Lobaito: which I sent an email off this morning to him about here's all the individual issue entitlements because people can buy issues individually. And now since we're saying they can view it on the website,

Liz Wilson: Perfect.

Justin Lobaito: I need to map the the entitlements I just gave Gal back to the website. So I gave I gave Gal a CSV of all of your um SKUs of

Liz Wilson: Okay.

Justin Lobaito: your back issues and and gave instructions as far as to add these entitlements to each of those.

Liz Wilson: Okay. And that's separate from what we're doing on this and with the website, which is you need these to actually, you know, put into the web.

00:10:59

Justin Lobaito: I need this so people can actually read the content in a digital format on the website.

Liz Wilson: Okay,

Justin Lobaito: People and so so let's say somebody comes in and they their their subscription or their

Liz Wilson: perfect.

Justin Lobaito: entitlements match up to this issue, right? They won't get the subscribe to read button.

Liz Wilson: Okay.

Justin Lobaito: They'll get download the PDF, but they can also then read all the individual articles. So this is what it extracted from that PDF. Um this is the free one. So if if somebody's not if somebody isn't uh subscribed, we preview one article from the issue.

Liz Wilson: And how do we select the one

Justin Lobaito: So back inside here, we can always change which one is the free one.

Liz Wilson: article?

Justin Lobaito: So here is the So here's all the articles. Now these are HTML content inside of a database. And we can edit this one to be uh locked paywalled. We'll save that. And then we'll say we want maybe um threeleaf audio that one to be the free one.

00:12:03

Justin Lobaito: Right now it just defaults to whatever the cover article is. But I can I can change the logic to say hey like pick the fifth article in it to be the free one. But then you can also once I release this, you can also manually go in and pick which ones you want to be the free article.

Liz Wilson: Okay. So, all right.

Justin Lobaito: I I understand that. So we have almost

Liz Wilson: you know, almost 200 almost 300 issues here once we get to

Justin Lobaito: 300.

Liz Wilson: that.

Justin Lobaito: Yep.

Liz Wilson: Um,

Justin Lobaito: will automatically assign a free article.

Liz Wilson: will it just automatically and then how

Justin Lobaito: I don't know if there's just some type of and then how it's always

Liz Wilson: long will it remain free?

Justin Lobaito: free and that's the whole point of it is that it's a marketing tactic to get people to see what's inside the issue like a little teaser and then kind of get kind of get them either to subscribe or to purchase that specific issue.

Liz Wilson: Okay.

00:13:00

Justin Lobaito: It's just it's just one article out of the issue.

Liz Wilson: It's your one article. Okay. Um and I just the cover articles because it would some of like the fifth article sometimes they're

Justin Lobaito: Okay.

Liz Wilson: smaller. They're not really it. Well, maybe we could say because I'm just saying they're all a little bit different.

Justin Lobaito: Um,

Liz Wilson: You know what I mean? So, um, again, you have your different categories. I didn't know if you could like I don't know. Help me out here. It's just like I just want to make sure that if it's there free forever, sometimes that first article is the majority of the issue. So,

Justin Lobaito: Yep.

Liz Wilson: they'll get that whole issue kind of thing. And then um I guess what I'm saying is that

Justin Lobaito: I guess you

Liz Wilson: only that's that only one choice.

Justin Lobaito: have

Liz Wilson: You have one this how you pick I'm going to do every article and up here.

Justin Lobaito: to have

00:13:51

Liz Wilson: Is there another way you could have more of a random selection so that

Justin Lobaito: more random selection so that it covers a little bit of everything

Liz Wilson: it covers a little bit of everything?

Justin Lobaito: amongst amongst issues.

Liz Wilson: Is it amongst the issues like if

Justin Lobaito: are everything within itself.

Liz Wilson: you if you go and you know I was saying like you don't want them to get the cover article like

Justin Lobaito: Y article like you said, well,

Liz Wilson: you said you know let's just do maybe April 5th

Justin Lobaito: you know, let's just say Yep. I can I can always say pick a random one.

Liz Wilson: um

Justin Lobaito: That's Excuse me. I can always say pick a random one that's not the cover article.

Liz Wilson: that's not the cover article I see And then anytime you can go

Justin Lobaito: I can always say that. anytime.

Liz Wilson: in and change that and then we'll do a different So let's just let's let's just try that.

Justin Lobaito: Yep.

Liz Wilson: I you know I'm open for that because then people will be getting there and just digging and reading everything.

00:14:43

Justin Lobaito: Yep.

Liz Wilson: So,

Justin Lobaito: And then also what happens then is all of the issue all all the

Liz Wilson: so

Justin Lobaito: articles get then pushed into

Liz Wilson: again

Justin Lobaito: um an actual like topic section inside your website and they get parsed out and

the things that are behind the payw wall all they get is just like the preview of this. So here subscribe to read the full article but then if there are some that are free they can read it right here. Like this one was the free one. Free to read, subscribe, free to read, subscribe, free to read. So the free to read ones are now this one was a default placeholder one I did. So free to read ones are like right here. They can just read the entire thing and they can see things like more in this issue. But as I go through it and I try to read it, it's behind the payw wall. Now article.

Liz Wilson: Okay. So, getting back to that. So, that was a that was a free article.

00:15:39

Justin Lobaito: Yeah, this was a free article that was tied to So they read the whole thing.

Liz Wilson: Show me So they can read so they read the whole thing.

Justin Lobaito: Yeah. Yep.

Liz Wilson: Yeah, that's a good one.

Justin Lobaito: Okay.

Liz Wilson: Okay.

Justin Lobaito: Y

Liz Wilson: And then but is that the the whole article you

Justin Lobaito: then I mean I'm going to reimport things.

Liz Wilson: said?

Justin Lobaito: I've made the importer a little bit more intuitive and smarter about how it reads your PDS specifically. So before when I was testing these like this one I don't know when I imported this one but as of last week I've got a much smarter importer to read yours PDS. So, what this I don't know if this one is the entire content. I do what I do know is that if I look at um the most recent one that I did Oh, hold on here. Let me bring him up. Uh, this one's free. Save it. Come back here. I did QA this one.

00:16:37

Justin Lobaito: This one's the entire article. It pulled out a quote.

Liz Wilson: Love

Justin Lobaito: Yep.

Liz Wilson: that.

Justin Lobaito: The styling looks like got a little messed up. This should be in bold and gold. But what I'm doing, what my next iteration is,

Liz Wilson: Okay.

Justin Lobaito: is to import the images out of the articles as well too, which is what this is

missing.

Liz Wilson: Okay. And those will be placed wherever they were in the article, too.

Justin Lobaito: As best they can.

Liz Wilson: Like just Yeah.

Justin Lobaito: Yeah.

Liz Wilson: Yeah. Right. In between if it's not Yeah,

Justin Lobaito: Yeah.

Liz Wilson: sure. Yeah. Because well, the end of the article would just say, you know,

Justin Lobaito: TQ and whoever wrote the article.

Liz Wilson: TQ,

Justin Lobaito: Yeah.

Liz Wilson: whoever wrote the article and then the contact information.

Justin Lobaito: And contact information.

Liz Wilson: Yeah. So, are are we still doing that,

Justin Lobaito: Yeah.

Liz Wilson: too? If the entire article appears at the bottom, every article should have contact information in the newsletter.

00:17:34

Liz Wilson: But I'm just saying on here,

Justin Lobaito: Would we do that here too?

Liz Wilson: would we do that here?

Justin Lobaito: Um I mean the author's the author's at the top now.

Liz Wilson: It would make sense,

Justin Lobaito: Um,

Liz Wilson: right?

Justin Lobaito: right.

Liz Wilson: So if there that's the individual individual article however when they they get the u

Justin Lobaito: How when they they get the um the full PDF,

Liz Wilson: the full PDF shouldn't it have everything that's in the PDF

Justin Lobaito: shouldn't it have everything that's in the PDF? The issue itself is exact copy of the issue,

Liz Wilson: the itself is

Justin Lobaito: I guess, is what I'm getting.

Liz Wilson: exact

Justin Lobaito: The PDF, the PDF is whatever PDF you give me. That's always going to be downloadable as the PDF you give me.

Liz Wilson: correct right and then but the articles when they come out let's

Justin Lobaito: But the articles when they come out, let's just let's just say these

Liz Wilson: just does Let's just say these are it says

Justin Lobaito: are preview.

00:18:19

Liz Wilson: preview.

Justin Lobaito: So these right here is this is the

Liz Wilson: So these right here you put in here these are all the entire

Justin Lobaito: entire issue.

Liz Wilson: issue.

Justin Lobaito: Yep. Okay.

Liz Wilson: Okay. And does it each one have the entire

Justin Lobaito: the entire protocol. No, because this user is not this user doesn't have the entitlement to read this issue.

Liz Wilson: article?

Justin Lobaito: So, what we give them is one free one, whichever logic want to do a free one and then the other ones are just preview until they log in and we match up that they have the access to read it. It's only going to be one article out of each issue is free.

Liz Wilson: So,

Justin Lobaito: Okay.

Liz Wilson: even if they get that one article, does it at go all the way to the end and does it give like the content like all the way,

Justin Lobaito: all the way to the end and does it give like the content like

Liz Wilson: you know, um we always put the context source at the very end?

00:19:04

Justin Lobaito: yeah

Liz Wilson: Is it the actual entire article from beginning to end?

Justin Lobaito: so when I was looking at this one the milkman one I was QAing it one second here 2026 oh this 2025 So if I look at here, so the milkman just this one milkman delivers again.

Liz Wilson: Perfect.

Justin Lobaito: I was queuing all of this. It was getting all this content. It was reading left to right, left to right, left to right. And I was looking at like did it did it capture the very last question which or very last article.

Liz Wilson: Oh, just the entire article in the end.

Justin Lobaito: Yep.

Liz Wilson: Yeah.

Justin Lobaito: So it got all the way to here. What it didn't have was this but I assume this is the author. We we can put that at the top. So the article ends here. I think that's where we end here. Are you planning to take speakers separately far less? Where did that

Liz Wilson: Stay

Justin Lobaito: go?

00:20:22

Liz Wilson: back.

Justin Lobaito: Looks like we um we need a little bit

Liz Wilson: It stopped. It stopped right there.

Justin Lobaito: more.

Liz Wilson: Guitar speaker made Prince V since JBL for the bottom in the very top left.

Justin Lobaito: see the top

Liz Wilson: It stopped

Justin Lobaito: left.

Liz Wilson: there

Justin Lobaito: Are you playing off a speaker separately right

Liz Wilson: and then see at the very end in the last word in that word is read and then it's

Justin Lobaito: here?

Liz Wilson: speaker made. Yeah. Speaker made it stopped there. It didn't pull in all that copy to finish the article.

Justin Lobaito: is over here. You're

Liz Wilson: Yeah. See all that even underneath there at the very Okay.

Justin Lobaito: saying

Liz Wilson: Go look at the left hand column at the very top made since JBL stop. See it stopped there.

Justin Lobaito: it stopped there.

Liz Wilson: Higher quality made and it

Justin Lobaito: Oh, speaker

Liz Wilson: stop at the top left.

Justin Lobaito: made

Liz Wilson: See the Lord made it stop there.

00:21:38

Justin Lobaito: it created a sentence and it should keep going.

Liz Wilson: Keep

Justin Lobaito: Yep.

Liz Wilson: going.

Justin Lobaito: All right, I will I will keep working with this to get the importer working. If if we get to like next week and this isn't doing

Liz Wilson: Yeah.

Justin Lobaito: in a way that we feel is consistent, I recommend we just go back to downloading the then I'll recommend for our phase one launch,

Liz Wilson: Mhm.

Justin Lobaito: we'll go back to downloading the PDFs. So we can extract here here's the articles that are in it like we have um like we have on the issue page right here. So we can say, "Hey, here's what's inside." And give all of the articles that are inside of it without without reading them.

Liz Wilson: Where you

Justin Lobaito: And they can either buy it or or not. And if they have the entitlement,

Liz Wilson: go?

Justin Lobaito: that means they have access to this. They can download it directly from this page. So this still supports everything that we're talking about without but what we lose is reading the articles directly from the website but the website still becomes your single source to drive people to to either download it or buy it.

00:22:47

Justin Lobaito: You no longer have to worry about trying to create a a a link that you have to keep track of all the time. The website send people always to the website. So when you send out a newsletter about a new one, you'll send them to this URL here of slashissu, you know,

Liz Wilson: You

Justin Lobaito: June 2026 and the website will do everything as far as from

Liz Wilson: shoot.

Justin Lobaito: there logging them into Pelcro if they have an account and checking if they have an account, do they have access to to this issue. So, best case scenario is the importer works and people can read your content directly from the website while still be able to download the PDF. Worst case scenario is we're just back to people downloading the PDF directly from your website though as opposed to anything with Mailchimp or anything with emails. The email is just going to drive people to a web page.

Liz Wilson: Okay. Yeah.

Justin Lobaito: Okay.

Liz Wilson: What I'm currently doing,

Justin Lobaito: Right.

Liz Wilson: right?

Justin Lobaito: Well,

00:23:48

Liz Wilson: So,

Justin Lobaito: aren't you driving them to a you're just driving them to a download link,

Liz Wilson: yeah.

Justin Lobaito: right?

Liz Wilson: Right. Correct.

Justin Lobaito: Correct.

Liz Wilson: What I just did.

Justin Lobaito: What I do is

Liz Wilson: Yeah. It's just simple as that. email goes out and it says, you know,

Justin Lobaito: Yeah.

Liz Wilson: click here to download your issue. then it brings them to the website and then they it gives them that website you know link to click and then the issue

Justin Lobaito: Yep.

Liz Wilson: pops up you know and uh currently right now it's

Justin Lobaito: Exactly.

Liz Wilson: um again just trying to the most simple thing with like okay

Justin Lobaito: again just trying to the most simple thing with public is like okay guys you

Liz Wilson: guys I you know if I sent you think about the renewals and stuff like that right now with the way that we've

Justin Lobaito: know things about the stuff like that right now the

Liz Wilson: gathered the list I'm beginning to see how when I give it to Eric to go through in

00:24:22

Justin Lobaito: lift

Liz Wilson: the mailhouse you a few little glitches simply but it's not the way

Justin Lobaito: house you know glitches there should be simpler but it's not you know it's just the way that

Liz Wilson: that and uh the way that I'm collecting the list and building it. Um so having said that when I send them the email that download the link anyone can download from that.

Justin Lobaito: email

Liz Wilson: I'm not telling you that they can do that,

Justin Lobaito: that they can do that. Yeah.

Liz Wilson: but I'm just leaving it there because right now I'm just going to keep up with everything and and get this website launch and the issues out and blah blah blah. But um

Justin Lobaito: So here's what we can do. So let's say the importer doesn't work and we can't get the articles out of your issues. Our fallback is driving people to the website but having the website handle verification if they can download or not. And that's where Pelcore comes into play by using the entitlements I sent them this morning, create an entitlement strategy for each individual issue and then the the website will check if people have access to read them or not based upon their login status.

00:25:39

Liz Wilson: status. Okay.

Justin Lobaito: what we can do. So then your process will be you come into the back end of this,

Liz Wilson: So you probably go

Justin Lobaito: you go to issues,

Liz Wilson: to

Justin Lobaito: you create a new issue. Uh let's just call this one.

Liz Wilson: So I just like here might create an issue. I just got through the um May issue. So here's the May issue. So what goes in there?

Justin Lobaito: So what is there?

Liz Wilson: I got was

Justin Lobaito: my main issue. Well, I need the I need a PDF.

Liz Wilson: one.

Justin Lobaito: So, I'm gonna use a 2025 one just to just to test real quick. Oh,

Liz Wilson: Okay,

Justin Lobaito: okay.

Liz Wilson: I see.

Justin Lobaito: So, we're gonna say when I get the issue,

Liz Wilson: This is what I'll do every month when I get the issue.

Justin Lobaito: what that?

Liz Wilson: So,

Justin Lobaito: So,

Liz Wilson: you're saying this is what I'll do every month when I get the

00:26:23

Justin Lobaito: you're saying this is what I'll do every month when I get This is what you do when you get the issue. Every month, you're entering whatever your title here is,

Liz Wilson: issue.

Justin Lobaito: which is what I've been doing. You can enter what title you want to. Hearts, hands, uh, and heritage. This is September 25. And the volume is what is this one? Volume 26. Oh, there it is. 26 number 11. You create the issue. Oh, come on.

Liz Wilson: Okay.

Justin Lobaito: Dan out of hearts, hands, and heritage. Is it going to spin and create?

Liz Wilson: Yeah. Can Can you do this?

Justin Lobaito: Yeah.

Liz Wilson: I mean, don't I have to

Justin Lobaito: Don't I have to send you the PDF anyway? Yeah, I guess I can do all this for you. So, but what what I'm saying is what we can do then is once we upload and I'm getting an error on my code here, so I have to figure out what it is.

00:27:56

Liz Wilson: Okay, that's all right. That's all

Justin Lobaito: Once we what we can do is once we upload the issue and let's just take the importer

Liz Wilson: right.

Justin Lobaito: out side of this of doing like articles and let's just talk through how to make your current

Liz Wilson: Okay.

Justin Lobaito: process just better. Once we create the issue, I'll I'll add it to the system. We can have that automatically kick off once like our publish date comes up. We can have we can have that automatically kick off an email through Mailchimp to all your subscribers saying, "Hey," or all your list to say, "Hey, check out the latest issue." They'll have to log in to either get it or purchase subscription to get it depending upon what where they're currently at.

Liz Wilson: Okay.

Justin Lobaito: Okay.

Liz Wilson: So again once we load that in you're saying that

Justin Lobaito: You're saying that

Liz Wilson: it'll crow will automatic who sends it out how do how does it sent out because I'm my first thing you know again I'm going back to the email blast.

00:28:53

Liz Wilson: So when you say automatic it'll automatically email for everybody that has an
Justin Lobaito: automatic.

Liz Wilson: email that the issue is ready to download.

Justin Lobaito: Yep.

Liz Wilson: Okay. And I don't have to do that with

Justin Lobaito: That's what I'll that's what I'll test.

Liz Wilson: the

Justin Lobaito: But that's the that's the ideal state is that it's it's hey here's the latest

Liz Wilson: Yes.

Justin Lobaito: issue check it out and people who are subscribed can sub can log in to view it
and people who are not can

Liz Wilson: Well, that's perfect because,

Justin Lobaito: subscription.

Liz Wilson: you know, again, the ones that get the PDF, like you said, the ones that get the PDF
are the ones that, you know, provide an email address.

Justin Lobaito: Yep.

Liz Wilson: I have I have um others that are subscribers with the print who will not you know
give out their email address and then some that switched over for you know for

Justin Lobaito: Yeah.

Liz Wilson: the to get the um the PDF too. So I'm lacking some email addresses. So this is
good.

00:29:48

Liz Wilson: Okay. And then while we're in there too. Okay.

Justin Lobaito: Okay.

Liz Wilson: Go ahead.

Justin Lobaito: Go ahead.

Liz Wilson: I'll let you finish. I'm not gonna interrupt.

Justin Lobaito: And so so then best case scenario is we get the AI

Liz Wilson: We'll

Justin Lobaito: importer to actually read your PDFs entirely and extrapolate the articles out of
there so that when people come to it they get what we have

Liz Wilson: talk to you.

Justin Lobaito: here which is they come here subscribe to read or download depend depending
on what their login status is with Pelro. So here's the Pelco login. If if we can get the importer
to read your PDF correctly, all the articles will be inside here. And if they haven't subscribed,

they can get a little teaser of an article from the issue. But if they have subscribed, they can also read the entire article articles now from the website as opposed to the PDF. They can still download the PDF, but they can also read them directly from the web content.

00:30:50

Liz Wilson: Okay.

Justin Lobaito: Does that make

Liz Wilson: Yeah. So again,

Justin Lobaito: sense?

Liz Wilson: I'm a subscriber and I go in and I'm going to I can either just read it here, the total thing or I can download it and I'll have the PDF.

Justin Lobaito: Correct.

Liz Wilson: But again, this is like you said, everybody, this is moving forward, but everything but once this is launched too,

Justin Lobaito: Yep.

Liz Wilson: it'll only be those PDFs moving forward because I would have already sent them one or they would have gotten and if they don't, then um if they come back to the website, they're able to download any of those PDFs.

Justin Lobaito: That's what you and I were talking about last is is digital people. So what's that?

Liz Wilson: I know. I'm just kind of like, oh, you know, again, just trying to wrap my head around that. What's the best thing to do? Go

Justin Lobaito: So the last conversation that we had is that print people I don't touch anything with print

Liz Wilson: ahead.

00:31:47

Justin Lobaito: people. They they do your they they follow your current process. You you you have a print thing. You mail it out. You do the fulfillment. You mail it out to them. Right. Digital people can only access the issues on the website

Liz Wilson: people to only access the issues on the website that fall

Justin Lobaito: that fall within their current active subscription.

Liz Wilson: within their current Thank you.

Justin Lobaito: Right. Then then we were saying print the people who do the print and digital

Liz Wilson: Okay.

Justin Lobaito: they get the entire digital catalog. So they can lo they can go to the website and

they can view any back issue they want to because they've purchased that higher tier of subscription.

Liz Wilson: Okay.

Justin Lobaito: That's what I would recommend, but I know we've gone back and forth on that a couple times.

Liz Wilson: Okay. So again just plainly what you said if they have Okay. So if they do just the digital only they get access to their current digital subscription right and we are not sending them the

00:32:51

Justin Lobaito: Yep.

Liz Wilson: PDF.

Justin Lobaito: No, they get I mean they currently get the PDFs,

Liz Wilson: Yes. But okay.

Justin Lobaito: right?

Liz Wilson: So I just want to because you what's in my head what was sticking in my head was like the as a digital subscriber I subscribe and so all those are in their current phase and all the new subscribers will get the next PDF forward. So the the person who subscribes in and they have the entitlement for um within that phase all these particular issues. Right? And they can either look at them online or download them.

Justin Lobaito: Correct.

Liz Wilson: Correct. Now the print and digital.

Justin Lobaito: Yep.

Liz Wilson: So we just say when they do print and digital that was another thing too like what are we g we're going to offer the print and digital and then we have the print digital

Justin Lobaito: We're going to offer print and digital and then we have digital plus

Liz Wilson: plus everything which will be another 30 \$40 or you we just

Justin Lobaito: everything which \$40.

00:33:57

Liz Wilson: do one uh you

Justin Lobaito: Oh, I I say I say I make it easy for yourself.

Liz Wilson: know

Justin Lobaito: And dude, print and digital gives you the entire back issue catalog, but that's that's a you call.

Liz Wilson: Okay.

Justin Lobaito: Um you could you could bump that that one up to say like they're getting the entire digital catalog, just bump up the price that subscription just a bit.

Liz Wilson: Well,

Justin Lobaito: Or you can have a whole tier as you were alluding to about like a digital print plus subscription.

Liz Wilson: Um because I'm just trying to think about the gymnastics of okay again that's what I was telling you um I want to understand what we're doing because and then need your help in like presenting

Justin Lobaito: helping

Liz Wilson: here's you know being able to put that on the website here are the offers you know and then

Justin Lobaito: pres.

Liz Wilson: be able to explain exactly what's going to happen. That's why I was saying AI could be beautiful for that because it gets right to the point and here's just it's simple me as you can tell two wording don't need to know all that just get to the point tell me how to do it I click here and I give you the money so but again back to that I have to I know that when you said that I was kind of backing away from that but um I want to do it but then what about those that have paid the

00:35:28

Justin Lobaito: What about those that have paid the 119 they

Liz Wilson: 119 they get the in digital.

Justin Lobaito: didn't pay

Liz Wilson: So they're not paying the extra money.

Justin Lobaito: the extra money but maybe I should

Liz Wilson: But maybe I should do if this is on how we transition that would be that no matter what

Justin Lobaito: do we this is I'm just thinking how we transition that could be that no matter what even at

Liz Wilson: even at 119 they might have five issues left.

Justin Lobaito: 119

Liz Wilson: Well, those rest of the five issues is going to give them the opportunity to get them all. Is that what we're looking at? And then when they get all of them, you know,

Justin Lobaito: Yeah.

Liz Wilson: just we hope that they'll be happy and then they want it's a way to kind of give them like a trial.

Justin Lobaito: Okay.

Liz Wilson: You know, this is how it works and then if you keep subscribing, you get it. But

when you subscribe, it's going to be x number of dollars more.

00:36:19

Liz Wilson: You see what I'm saying?

Justin Lobaito: I would say um yes,

Liz Wilson: So,

Justin Lobaito: the people who come up for renewal if you want to. Okay, so here's like here's where I have it roughed out, right? So digital 10 PDF issues per year, one free bonus issue, current issue plus most recent back issue and all future issues while subscribed.

Liz Wilson: Did you?

Justin Lobaito: Okay, does that match? Okay. Print is 10 printed issues mailed to you,

Liz Wilson: Mhm.

Justin Lobaito: one free bonus issue of premium print quality. That's easy. That one matches, right? Yeah.

Liz Wilson: Yeah.

Justin Lobaito: So way I'm saying print and digital is 10 printed issues mailed to you one free bonus issue complete 270 plus issue archive since 1999 and then but these are two these bullet points are two the same current plus all future digital issues. This one's a bit more compelling. You have the issue archive but they're they're basically saying the same thing. all the digital issues you have access to from the website.

00:37:24

Justin Lobaito: Now, if you want to change the price of this

Liz Wilson: I will change the price I think because um now they would go back here and this would be like all

Justin Lobaito: this

Liz Wilson: the new ones coming in right so that if they go in and they want to subscribe it'll be the 119 plus the 40 bucks so 159 I'm thinking about is what it should be

Justin Lobaito: Yeah. So, so then how to handle so you if you're asking well how do I handle people who are currently

Liz Wilson: Um.

Justin Lobaito: subscribed at 119 to bump them up to that tier I would say that's a question for gal about like hey how do I you know how do we get

Liz Wilson: Mhm.

Justin Lobaito: this process going so that people who are at 119 can get bumped up to the 159 that you were saying I and then whatever whatever gal's suggestion is I can reflect the way

the website needs to communicate that. So if it's like you're 119 till your renewal comes in, but then you're up to 159,

Liz Wilson: Okay.

00:38:24

Justin Lobaito: that may be the cleanest way to do it. So just kind of give people the who at 119 until they have to renew again. But let them know at renewal time. And plus, we could also just say, okay, here's another way to do it as well, too. We could also just say that if you if you're enrolled at 119, you basically get digital and print the way that they are. So that in in the back end,

Liz Wilson: So that

Justin Lobaito: the entitlements would be like um digital print legacy,

Liz Wilson: entire

Justin Lobaito: right? That'd be the entitlement. It's like the legacy pricing for digital print, but then when they renew, they'll get the digital and print current pricing. So when they renew, it's the 159. So they'll kind of get they'll kind of get digital and print combined at 119 where they can only read the things on digital that digital gets and they also get the printed issues. But when they renew, they get renewed at the 159th. And this could be something that the three of us talk with all through about, hey, here's what we're running into.

00:39:30

Liz Wilson: Yeah, because my mind just I stop because I can't think through the way Pelro

Justin Lobaito: because I can't think.

Liz Wilson: works. You see, I'm like, okay, I'm gonna say yesterday.

Justin Lobaito: Well,

Liz Wilson: How are we gonna do that because that I sent you the one little simple thing about

Justin Lobaito: I sent you one little simple

Liz Wilson: I didn't realize I didn't really have to think about anything with Quickfill.

Justin Lobaito: thing.

Liz Wilson: I mean, again, like I did that for 30 years and I'm kind of like, all right, well, I'm just going to run the the mail list on May 1st. Well, I ran it and I go, wow, how did I lose, you know, 30 people? What happened there? So I looked and of course the phase date is 4:30 4:30 26. So I run them on May 1st. So I missed that. But see even though the phase ends on 4:30, they still have one issue remaining for them. See that's where it's like it's not the month and the issue don't match up anymore.

00:40:23

Justin Lobaito: So then let's let's call I don't know how we do

Liz Wilson: So I was kind of like I was like I don't how are we going to do that with

Justin Lobaito: that.

Liz Wilson: it?

Justin Lobaito: You know this just seems like when's your when's your next call with

Liz Wilson: like easy, but I'm not getting uh I don't

Justin Lobaito: Gal?

Liz Wilson: know. I'm about to lose you. I have to schedule. I did I did send that what I said to you about that.

Justin Lobaito: Yep.

Liz Wilson: Just like I just want it's easier for me to everything.

Justin Lobaito: It's easier for me to

Liz Wilson: If I just type this out, they can understand me better.

Justin Lobaito: copy.

Liz Wilson: And I wanted you to see what was on my mind. Um but um I can schedule something with him um about this.

Justin Lobaito: about.

Liz Wilson: Would you be involved?

Justin Lobaito: Yeah, sure.

Liz Wilson: Yep.

Justin Lobaito: Yep.

Liz Wilson: Okay. Because that would help me could help me explain what I need.

00:41:16

Liz Wilson: I'm plugging you in.

Justin Lobaito: I'm plugging

Liz Wilson: Sorry. I don't know why.

Justin Lobaito: you.

Liz Wilson: Still want to lose power. Okay. Okay. Still there. I say

Justin Lobaito: Thank

Liz Wilson: sorry.

Justin Lobaito: you.

Liz Wilson: I never thought I would be such a mumbling old woman here. Let's see. kind of guar. Okay. All right. So, um,

Justin Lobaito: Um,

Liz Wilson: when do you think best to set up a meeting with

Justin Lobaito: to set up like these

Liz Wilson: him? I was pretty quick on it,

Justin Lobaito: things.

Liz Wilson: but I didn't hear anything back from uh the other situation.

Justin Lobaito: I got some instructions

Liz Wilson: got some instruction from the support team and I'm going to try that this weekend and run those

Justin Lobaito: from

Liz Wilson: renewals and

Justin Lobaito: How about the 15th if we can? 15th. Yep.

Liz Wilson: 15th.

Justin Lobaito: In the afternoon be great.

Liz Wilson: And what time?

00:42:34

Liz Wilson: I like the 2 o'clock 2 p.m.

Justin Lobaito: o'. Yep, that's fine.

Liz Wilson: And I And what what day is that?

Justin Lobaito: That was a

Liz Wilson: Friday.

Justin Lobaito: Friday.

Liz Wilson: Yeah. Okay, we can do that. I don't know. Gal usually they usually do everything like on Thursdays or whatever, but I'll request for I'll ask

Justin Lobaito: I think Thursday wants me as well too though.

Liz Wilson: for Friday because I like Fridays, too.

Justin Lobaito: Okay.

Liz Wilson: U because there's so much going on during the week. And then if he says Thursday, then I'll move to Thursday.

Justin Lobaito: If it's Thursday, I have a window between um 1 and 2:30. That's about it.

Liz Wilson: Okay. So, do you want me just to you want me to push for Friday and say it's not secondary

Justin Lobaito: You want me to push

Liz Wilson: to Thursday and give him those times and let

Justin Lobaito: or the following or the following Monday?

Liz Wilson: him

Justin Lobaito: am wide open. So I would say those three days, Thursday, Friday or Saturday or

Thursday, Friday or

00:43:39

Liz Wilson: Monday and then you're just wide open on Monday.

Justin Lobaito: Monday.

Liz Wilson: So, when you say that but go ahead name a time your what

Justin Lobaito: Anytime after 1:00 your

Liz Wilson: you're okay after. Okay. 1:30.

Justin Lobaito: time

Liz Wilson: I'll just put 1:30 Eastern Planet on forward. Okay. Okay. Sounds good.

Justin Lobaito: All right. So, let's let me take the weekend and then maybe you and I are can touch base.

Liz Wilson: So what's

Justin Lobaito: Um um I'll

Liz Wilson: um

Justin Lobaito: give you a status update midweek next week. Uh and you continue to collect all the PDFs. I again I don't need the covers anymore I don't believe. But if you have them it probably doesn't hurt to be honest. So maybe just go ahead and grab them.

Liz Wilson: okay like what I have Now I I've got got them all in one file

Justin Lobaito: I've got I've got

Liz Wilson: package.

Justin Lobaito: all

Liz Wilson: But what happens all the old stuff is really a little bit of a mess.

00:44:44

Liz Wilson: So I got to clean that up while I was in there.

Justin Lobaito: that

Liz Wilson: I wanted to get everything you needed versus having to go back

Justin Lobaito: because it's very Yeah.

Liz Wilson: issue. Yeah. So that's what I'm going to do is go in, like I said, and pull out just the PDF for you.

Justin Lobaito: just the PDF

Liz Wilson: And then I can pull out the covers. one side by side in the same same folder and then each month

Justin Lobaito: same folder. Yep.

Liz Wilson: folder those 10 folders will be in one month one year.

Justin Lobaito: Yeah.

Liz Wilson: So, okay, like that like I gave you before. All right, I'll do it. And I I really want to work on it this weekend. I'm going to finish it with a few,

Justin Lobaito: weekend is that this

Liz Wilson: get that set up for the printer and then this weekend just um crap away at it because um during the week it's

Justin Lobaito: weekend

Liz Wilson: hard with all the phone calls and interruptions.

00:45:33

Liz Wilson: Um so I will get all that as much done as possible to you so you have it ready when you're ready. Okay.

Justin Lobaito: perfect.

Liz Wilson: And anything else? That's why I say tell me what to do,

Justin Lobaito: saying, "Tell me what to do." You know,

Liz Wilson: you know, Justin, because um I I'm sending out stuff that's just like

Justin Lobaito: because um I'm sending out stuff that's just like

Liz Wilson: in my mind like,

Justin Lobaito: in my mind like,

Liz Wilson: okay,

Justin Lobaito: "Okay,

Liz Wilson: this is are we working on this?

Justin Lobaito: this is I

Liz Wilson: Is there more I need to do? So, I just need instructions.

Justin Lobaito: will I will be in the loop as far as marching orders for both of us. Um things we need to figure out with with Pelro and I'm here to till we get this thing launched to get it wrapped up.

Liz Wilson: All right. So, all I need to do now for you is to put together the um all of the PDFs.

00:46:18

Justin Lobaito: That's correct.

Liz Wilson: Okay.

Justin Lobaito: Yep.

Liz Wilson: And then set up this meeting with U Gal.

Justin Lobaito: Yep.

Liz Wilson: Okay. All right.

Justin Lobaito: That'd be it.

Liz Wilson: Sounds good. All right. Thanks much. I appreciate your patience with me always.

Justin Lobaito: Oh,

Liz Wilson: Okay.

Justin Lobaito: no problem at all.

Liz Wilson: All right.

Justin Lobaito: I'll see you,

Liz Wilson: God bless.

Justin Lobaito: Liz.

Liz Wilson: Have a great weekend. Yeah. Happy Mother's Day.

Justin Lobaito: You too.

Liz Wilson: Do you have any parents that are be with you guys

Justin Lobaito: Yeah. Yeah.

Liz Wilson: or Oh,

Justin Lobaito: And my uh and my we'll be celebrating with my girlfriend as well, too. She has a four-year-old daughter and my Yep. We're we're going to go flower shopping with her mom and then go see with with her parents and

Liz Wilson: fantastic.

Justin Lobaito: then go see my parents after that for some ice cream and

Liz Wilson: Well, beautiful. Sounds great. Yeah,

Justin Lobaito: pie.

Liz Wilson: it's just it's me and my son and he's he's a gamer. So, every year he's with the last three years he goes off with his friends. So, I'll see him next weekend. But listen,

Justin Lobaito: Okay.

Liz Wilson: enjoy.

Justin Lobaito: Well,

Liz Wilson: Okay.

Justin Lobaito: h happy Mother's Day to you, too.

Liz Wilson: Thank you so much.

Justin Lobaito: Um,

Liz Wilson: I

Justin Lobaito: I hope you know, sleep in,

Liz Wilson: appreciate

Justin Lobaito: take a take a nice long bath, and enjoy the the nice weather we're hopefully finally

Liz Wilson: Yeah, you bet.

Justin Lobaito: getting.

Liz Wilson: Well, I've enjoyed it. It's been cool here. It's usually really super hot in May in Atlanta.

Justin Lobaito: Yeah. Yep.

Liz Wilson: It's been beautiful. But again, thanks so much. Um,

Justin Lobaito: You bet.

Liz Wilson: I appreciate it, Justin.

Justin Lobaito: Have a great weekend.

Liz Wilson: Okay, you too.

Justin Lobaito: Enjoy yourself.

Liz Wilson: Bye now. Okay,

Justin Lobaito: Bye.

Liz Wilson: bye.
